

Clayton Homes Energy Star Multi-Section Installation Checklist

Home Owner's Name: Home Owner's Name: Home Owner's Name: Home Phone Number: Living State Country This home was manufactured internformance to the 15st invite ments Proceed and the program. The items below to require the country that the home is stability in from the manufacturers Exercity STAR labeled home Program. The items out this effectivity is a stability of the relative setting the manufacturer. The items out this effective that the original copy to the manufacturer. Home location is the home located in the climate region indicated on the home's ENERGY STAR label (a lower region number is acceptable)? Yes No Marriage line sea! The marriage line areas must be filled with a non-porous insulating gasket creating a permanent air barrier. Identify that the following items are completed: Ceiling Bad walls Floor Gaskets have been installed on one side of the home at the factory. Gaps or tears may be repaired with air sealant foam. Tears in bottom board material repaired All tears in the bottom board material are covered and sealed to prevent air leakage with a durable patch. (Foam sealant can be used on lag bolt and other small holes). Hearthy that the following items are completed: Bottom hoard is intact or durably repaired. Crossover duct installation For multisection homes, the crossover ducts must be sealed with a permanent connection per the Manufacturer's Installation Manual. Identify that the following items are completed: All crossover ducts have been installed Crossover duct insulation is R-8 or higher Nylon or metal straps are used and are sing Crossover duct insulation is pushed into the belly and sealed with tape or foam sealant at each end Field Installed HVAC equipment Cooling equipment efficiency meets or exceeds the following performance rating: SEER13 Heating equipment efficiency meets or exceeds specifications: HSPF 7.6 (Nordyne T3)C Split System Beat Pump or equivalent) Description of deficient installation and steps taken to correct the deficiency: (Continue on back	Plant: Enter I	Plant Name and Number	Address: Enter Plant Address
This home was manufactured in unformance to the US Invite menty Precion Agen by Senergy STAR labeled home Program. The items belowed a equivare-tore ture that the tony is lastally incompleted by the retailer shall incomplete be with the narruncturers ENERGY STAR labeled home Program. The items or the checklist are to be completed by the retailer shing the home. After completing the checklist, the retailer shall sign the checklist and return the original copy to the manufacturer. Home location is the home located in the climate region indicated on the home's ENERGY STAR label (a lower region number is acceptable)? Yes No Marriage line seal The marriage line areas must be filled with a non-porous insulating gasket creating a permanent air barrier. Identify that the following items are completed: Ceiling End walls Floor Gaskets have been installed on one side of the home at the factory. Gaps or tears may be repaired with air scalant foam. Tears in bottom board material repaired All tears in the bottom board material are covered and scaled to prevent air leakage with a durable patch. (Foum scalant can be used on lag bolt and other small holes.) Identify that the following items are completed: Bottom board is intact or durably repaired. Crossover duct installation For multisection homes, the crossover ducts must be scaled with a permanent connection per the Manufacturer's Installation Manual. Identify that the following items are completed: All crossover ducts have been installed Crossover duct insulation is R-8 or higher Nylon or metal straps are used and are snug Crossover duct insulation is pushed into the belly and scaled with tape or foam scalant at each end Field Installed HVAC equipment Cooling equipment efficiency meets or exceeds the following performance rating: SEERI3 Heating equipment efficiency meets or exceeds specifications: HSPF 7.6 (Nordyne T3QC Split System Heat Pump or equivalent)	Home Serial N	umber:	Model Number:
This home was manufactured in unformance to the US Invite menty. Pre-botton Agent of SENERGY STAR labeled home Program. The items belowed required too write that the tomy is lestall, in completion with the manufacturers ENERGY STAR labeled home Design. The items or mass checkhest are to be completed by the retainer-so Hing the home. After completing the checklist, the retailer shall sign the checklist and return the original copy to the manufacturer. Home location Is the home located in the climate region indicated on the home's ENERGY STAR label (a lower region number is acceptable)? Yes No Marriage line seal The marriage line areas must be filled with a non-porous insulating gasket creating a permanent air barrier. Identify that the following items are completed: Ceiling End walls Floor Gaskets have been installed on one side of the home at the factory. Gaps or tears may be repaired with air sealant foam.
